Welcome! Hear the Warmth.

## TLA-50 Tube Leveling Amplifier

Add the warm sound of classic Summit Audio compression to your music with the **TLA-50 Tube Leveling Amplifier**, the newest offering from the first name in vacuum tube processing. This single channel tube leveling amp will warm your signals like nothing else. With XLR -10dB and 1/4" +4dB inputs and outputs, the TLA-50 will interface into any studio with ease. The TLA-50 also features side chain access, stereo linking with another TLA-50, switchable attack and release times, fully adjustable gain and gain reduction control and accurate VU metering with OL indication. All the warmth of that classic Summit Audio tube sound at an unreal price.

## Features

- TLA-50 features include: 1/4" TRS -10dB and XLR +4dB input and output
- Automatic level matching for interfacing -10dB and +4dB devices
- 3 position attack and release settings
- Continuously variable gain and gain reduction controls
- VU metering of input level or gain reduction
- Overload indication
- Side chain access on 1/4" TRS jack

- Stereo linkable with another TLA-50
- Internal high voltage power supply
- One 12AX7A/ECC83 vacuum tube
- 3 year warranty
